

ME-470

Entertainment Robot

Neobotix is proud to present the Entertainment Robot ME-470, the optimal solution for a new dimension of event management and customer contact. Different from ordinary remote controlled robots, ME-470 is much more than just an eye-catcher:

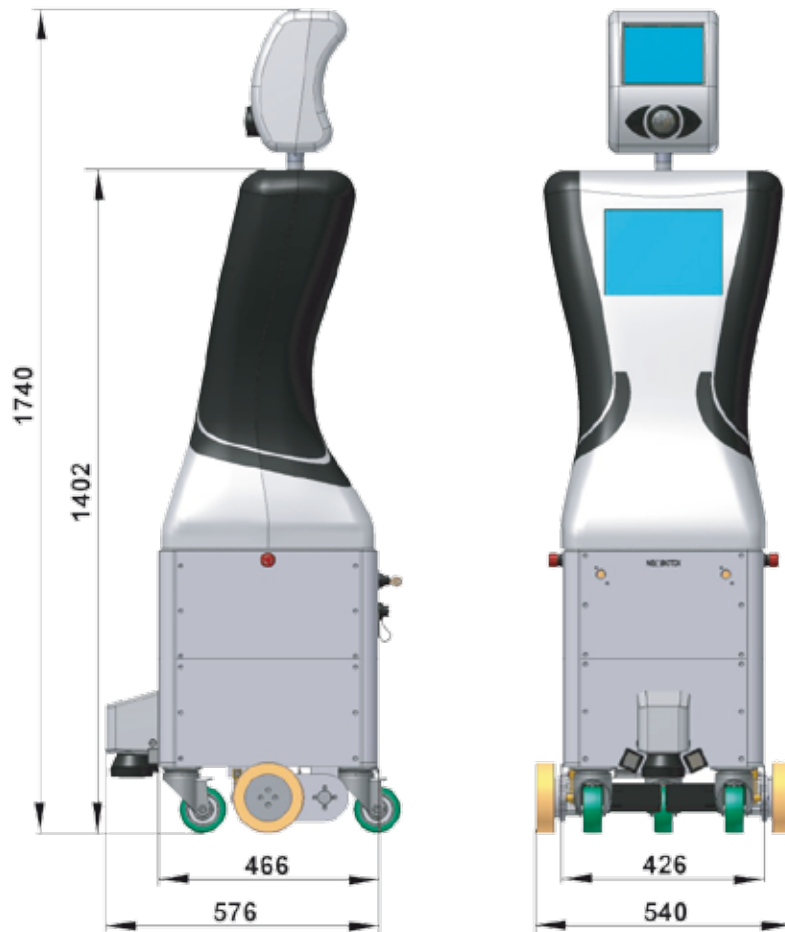

Everything is possible, from being a mobile platform to display your PowerPoint presentation to making interactive dialogues and playing games, including physical interaction. ME-470 can greet visitors, lead guided tours, present your latest products as well as serving as a mobile webcam, enabling customers to roam around your showroom from their homes.

The basic version is already completely mobile and equipped with a 12"- touch screen. Customizations and enhancements are practically limitless: audio system, light effects or a unique design, a movable head with webcam and touch screen, even two arms with hands or additional axes. The ME-470 can be individually customized according to your wish.
